

A CpG density across HES5 promotor amplicon

B Benign TB09.1008

C Tumour TB09.1008

Supplementary Figure 3 Summary of amplicon bisulfite sequencing of the HES5 promoter region in 39 tumour normal pairs. (A) CpG density across the 441bp HES5 promoter amplicon. (B-C) Sequencing coverage for each CpG assayed across the HES5 promoter amplicon for representative (B) benign and (C) tumour samples.
