Supplementary Figure 11. Chemokines, cytokines and growth factors in 8305C and SW-579 xenograft thyroid tumours are significantly suppressed by ONO-8430506 treatment compared to vehicle treatment (additional results to Figure 9). Mice were treated daily with 20 mg/kg of the autotaxin inhibitor ONO-8430506, and vehicle mice were gavaged with water. Tumours were collected 6 h after last treatment. Multiplex measurement results are normalized to total protein content. Results are means ± SEM for 4-6 mice per group, *p<0.05 compared to vehicle treatment, NS = not significant, ND = not detectable.
