

Supplementary Figure 12. Cell proliferation in rat thyroid glands. Ki67 immunohistochemistry was performed on thyroid glands from aged $p27^{+/+}$ rats showing C-cell hyperplasia (CCH) or MTC (rats $n=5$) as well as on glands of $p27^{+/mut}$ rats with CCH or MTC (rats $n=5$). Representative stainings are shown. Size bar: 20 μm . Original magnification: 400X.
