Figure S1

Graph A: Overall survival probability vs. Time (months) for different PD-L1 expression levels.

Graph B: Cancer-specific survival probability vs. Time (months) for different PD-L1 expression levels.

Graph C: Overall survival probability vs. Time (months) for PD-L1 expression ≥1% cutoff. 

Graph D: Overall survival probability vs. Time (months) for PD-L1 expression ≥3% cutoff.

Graph E: Overall survival probability vs. Time (months) for PD-L1 expression ≥50% cutoff.

Graph F: Cancer-specific survival probability vs. Time (months) for different PD-L1 expression levels.

Statistical significance:
- Graph C: $p=0.87$
- Graph D: $p=0.82$
- Graph E: $p=0.38$
- Graph F: $p=0.96$
