

Supp Figure 3: Quantification of NIS protein levels in Western blots of CKI and EW7197-treated *Braf* mice. **A)** Bars represent the mean vinculin normalized expression of NIS \pm SEM from the Western blots shown in Fig 4E. **B)** Immunohistochemistry for CD45 in PTCs from *Braf* mice treated with vehicle, CKI or CKI+EW7197. **C)** Membrane expression of NIS (mean \pm SEM) from co-immunofluorescence staining in Fig 4F. * $p < 0.05$, ** $p < 0.002$
